Professional Summary

Full-Stack Developer with expertise in developing production-grade web applications using the MERN stack and Next.js. Proven experience building CRM systems, SaaS platforms, and real-time dashboards for business operations. Focused on writing clean, maintainable code with emphasis on performance optimization and scalable system architecture.

Technical Skills

- Frontend:** React, Next.js, TypeScript, TailwindCSS, Redux Toolkit, Shadcn UI, Framer Motion, GSAP
- Backend:** Node.js, Express.js, REST APIs, Sequelize, Prisma, Knex.js, JWT, Socket.IO
- Databases:** MySQL, MongoDB, PostgreSQL
- Tools:** Git, GitHub, GoHighLevel API, Cron Jobs, Jira, Asana, Google Analytics (GA4), AWS EC2

Professional Experience

Full-Stack Developer | MERN

Feb 2024 – Present

NetworkAlgo Business Solutions

Worked as a Full-Stack Developer on enterprise-grade CRM and Property Management systems for vacation rental and B2B marketing businesses. Designed and developed a multi-tenant CRM with location-based access control, lead management, support workflows, and booking systems for multi-property resource allocation. Built real-time sales and performance dashboards using React and Highcharts to track lead conversion and team metrics. Integrated third-party APIs including GoHighLevel for automated contact synchronization, appointment scheduling, and marketing workflows. Improved application performance using Next.js optimizations such as lazy loading and dynamic imports. Implemented background jobs and cron tasks for token refresh, data synchronization, and scheduled processing. Developed reusable UI components and integrated GA4 and Google Tag Manager for user behavior and analytics tracking.

Education

B.E. Software Engineering

Mehran University of Engineering & Technology, Jamshoro

Nov-21 - 2025

GPA: 3.4/4.0

Key Projects

CRM & Property Management System

Oct 2024 - Nov 2025

React, Node.js, MySQL, sequelize

Developed a multi-tenant CRM and Property Management System for vacation rental businesses with location-based access control. Built real-time sales dashboards using React Highcharts to track lead conversion and team performance metrics. Integrated GoHighLevel API for automated contact synchronization and appointment scheduling. Implemented a booking system to manage resource allocation and availability across multiple properties. Configured cron jobs for automated token refresh and background data processing tasks.

IntelliShare.ai — B2B Marketing Platform

Jun 2024 - Aug 2024

NextJs, React, Node.js, MySQL, Socket.IO

Built a B2B marketing platform for the timeshare industry using Next.js and React, focusing on performance and scalability. Optimized application performance through lazy loading and dynamic imports, improving page load times. Developed a reusable component library to ensure long-term maintainability and consistent UI patterns. Integrated Google Analytics 4 (GA4) and Google Tag Manager (GTM) for detailed user behavior tracking.

Real-Time Stock Analysis Tool (NSE)

Oct 2025 - Nov 2025

React, Node.js, MySQL, Socket.IO

Developed real-time dashboard for tracking NSE option chain data with live market updates. Implemented WebSocket communication using Socket.IO for sub-second data refresh rates. Built automated cron jobs to fetch market data during trading hours (9:15 AM - 3:30 PM IST). Added market sentiment indicators, FII/DII activity tracking, and automated data cleanup routines to manage storage efficiently.

Community Family Tree Management System

Jan 2024 - Sep 2024

React, Node.js, Sequelize, MySQL

Developed genealogy platform with interactive family tree visualization and navigation. Designed relational database schema using Closure Table pattern to efficiently handle hierarchical data structures. Implemented role-based access control, multi-community separation, and comprehensive audit logging. Structured application following MVC architecture for improved maintainability and code organization.

Personal Portfolio Website

Mar 2023

React, TailwindCSS, Vercel

Designed and developed responsive portfolio website with JSON-based content management system. All content is managed through a single JSON file, making updates simple without modifying UI code. Optimized for mobile responsiveness and fast loading times across all devices. Deployed on Vercel with continuous integration for seamless updates.

Certifications & Awards

- **AWS Cloud Technical Essentials** – Amazon Web Services (Coursera, 2025)
- **Hacktoberfest Participant** – AWS Cloud Club MUET (2024)
- **Technplay 2023 Competitor** – Mehran UET Software Engineering Dept (2023)

- **JavaScript Frontend to Backend** – Microsoft Learn Student Ambassador Event (2022)
